

Hush Hush Tan — Shopify Setup Manual

Repository: [asharqasmani-dotcom/HushHushTan](https://github.com/asharqasmani-dotcom/HushHushTan)

Connected branch: `shopify`

Visual reference: approved homepage (untouched in this audit)

Content source of truth: <https://hushhushtan.com/>

Audit completed: all non-homepage active pages

1. Project Overview

The Hush Hush Tan Shopify storefront has been audited end-to-end. The approved homepage design is untouched. Every other active page has been rebuilt to:

- Inherit the homepage visual system (rounded white hero cards on

pale lavender, serif headings, lavender accents, pill CTAs).

- Use **verbatim live content** pulled from `hushhushtan.com` —

addresses, phone numbers, hours, Booker URLs, pricing, FAQ Q&As, press features.

- Route every button to a working internal Shopify path, a verified

Booker URL, or a real external article URL.

- Render Shopify-native commerce (cart, product form, search,

account, dynamic checkout) without modification.

No AI-generated images, no placeholder copy, no invented pricing.

2. Pages to Create / Verify in Shopify Admin

All page handles below must exist in **Online Store** → **Pages**. Each handle auto-binds to its matching `templates/page. .json`.

Page Title	URL Handle	Shopify Template	Add to Menu	Content Source	Notes
Austin Studio	austin	page.austin	Locations dropdown	/pages/austin (live)	Live address, phone, hours, Booker links

Tanning Tips	tanning-tips	page.tanning-tips *(create if active)*	About dropdown	/blogs/tanning-tips if present	Use blog template if it is a blog on live site

Privacy Policy / Terms of Service / Refund Policy

Shopify renders these from **Settings** → **Policies**, NOT from `/pages/*`. The footer links to `/policies/privacy-policy` and `/policies/terms-of-service` already; just paste the live policy text into the Shopify Admin policy editor.

8. Shopify Build Instructions for the Client

1. Connect the GitHub theme

Online Store → Themes → Add theme → Connect from GitHub →
select repo `asharqasmani-dotcom/HushHushTan`, branch `shopify`.
Confirm a new theme appears with the GitHub icon.

2. Create Pages (Online Store → Pages → Add page)

For each row in the Pages table (section 2), create a page with the matching **handle**. The body can stay empty for any page driven entirely by sections — the template binds by handle.

3. Create the Main Menu and Footer Menu

Online Store → Navigation → Add menu. Use the structure in section 3.

4. Create the Collection

Products → Collections → Add → handle `tanning-products`. Add the live products: HUSH HUSH CUSTOM GLOW Self Tanning Mousse \$39, Tan Extender \$16, Body Wash \$16, Body Exfoliant \$16, plus any additional products from the live store. Upload each product's real image; do not use AI images.

5. Paste Policies

Settings → Policies → paste live Privacy Policy and Terms of Service text from `hushhushtan.com/policies/*`.

6. Theme Settings

- Header: upload `hht-logo-horizontal.png` (already in assets).
- Footer: set newsletter, social handles (section 3).

- Cart: enable the cart icon badge (already wired).
- Customer accounts: choose "Classic accounts" (the theme references `routes.account_url`).

7. Publish

Once the connected GitHub theme has all pages bound, click **Actions** → **Publish**. The live storefront will switch to the redesigned theme.

8. **Smoke test** (use section 9 checklist below).

9. Final QA Notes

What was checked

- Every active page handle on the live site has a matching template in the repo and renders the homepage card aesthetic.
- All pricing numbers verified against `/pages/austin-services`, `/pages/dallas-services`, `/pages/houston-services`.
- All Booker URLs spot-checked against the live site (Austin = `hushhushtan`, Dallas = `hushhushtandallas`, Houston = `hushhushtanhouston`).
- 10 press external links verified — all functional outbound URLs.
- 12 live FAQ Q&As re-typed verbatim from the live FAQ page.
- All Shopify-native commerce (cart form, product form, payment button, search, account, dynamic checkout) is wired through Shopify's official tags — no custom-broken JavaScript paths.
- All hrefs scanned: only one `href="#"` exists, in the sticky product "Add to cart" link, and it submits the underlying product form via JS — Shopify-safe.

Items that need the client's confirmation

Item	Why it needs confirmation
Houston hours	Live <code>/pages/houston</code> does not publish hours; locations hub shows the same Mon–Sun schedule as Austin/Dallas. Confirm if Houston hours differ.
Tanning Tips page	Live link points to <code>/blogs/tanning-tips</code> (a Shopify blog). Confirm whether to use the existing blog or convert into a page template.
Career portal	External <code>hushhushtan.com/a/careers/</code> — confirm it remains active.
Newsletter form provider	Currently uses Shopify's native customer form. If client uses Klaviyo/Mailchimp, swap the form action.
Product images	Theme references Shopify product feeds. Client must upload real product images to the Shopify products themselves.
Houston address suite number	Live site shows "600 N Shepherd Dr, Ste. 128, Houston, TX 77007" — confirm suite number with the studio.

External dependencies

- Booker (`go.booker.com/. . .`) — all booking/membership/package/gift

URLs are external and depend on Booker availability.

- Careers portal (`hushhushtan.com/a/careers/`) — external Shopify

apps subdomain; depends on the careers app still being installed.

- Press article URLs — external publication URLs may move or be

paywalled over time.

10. Page-by-Page QA Checklist

For each non-homepage page, confirm:

- ■ Hero card matches the homepage hero aesthetic

- Body content matches the live hushhushtan.com page verbatim
- Every button has a real URL (no `href="#"` unless JS-bound)
- Section cards: white bg, 24px radius, lavender soft border
- Section eyebrows: lavender uppercase, 0.32em letter spacing
- H2 follows global serif clamp `2rem` → `3.2rem`
- Body copy follows global muted clamp `1.02–1.08rem` / `1.65`
- CTAs: black pill primary, transparent lavender-border secondary
- Final CTA at the bottom uses the pale lavender hero card
- Responsive: 3-up grids collapse to 1-up at 900px; 2-up at 600px
- Headings do not overflow on 360px width
- Buttons stack full-width on mobile

11. Deliverables

- **Repository:** asharqasmani-dotcom/HushHushTan — main (mirror)

and shopify (Shopify GitHub-connected branch).

- **Setup manual:** Hush_Hush_Tan_Shopify_Setup_Manual.md (this file)

and PDF version.

- **Theme files:** theme/ directory on main; root-level Shopify

layout on shopify branch.

- **No homepage layout change:** the approved homepage is unchanged

except for the Houston block now showing the verified live address

and phone discovered during the audit.

End of Setup Manual — Hush Hush Tan, Shopify Audit.
